# Technology, quality & service

## Engineered to Save Lives™

As one of the world's leading manufacturers of reflective materials, the ORAFOL Group earned its reputation for global excellence through its dedication to ingenuity, quality and service. When it comes to supplying products for the traffic control industry, we work each day with a dedication grounded by our knowledge that the quality of our products helps to save lives.

ORAFOL's dedication to quality and service is reflected in every aspect of the business. From research and development to product delivery and customer service, our commitment to excellence through people, processes and technology is unparalleled.

At the core of our excellence is our dedicated team. Around the globe, ORAFOL employees represent the industry's brightest and most innovative experts who are committed to focusing on customer needs with a stringent dedication to continuous improvement and process control.

Within a supportive environment, employees are encouraged to partner with customers to develop and produce the most innovative solutions to meet customer needs, whether they are standard or customised products.

Our teams are supported with a framework of an integrated management system which combines both ISO 9001 and ISO 14001 to ensure consistency of process and quality, while protecting our environment.

Of course, people and processes must be supported by the most advanced tools. Our investments in the latest facilities, technology for research and development, custom manufacturing equipment, process control and delivery logistics systems ensure our status as a market leader.

A commitment to excellence extends beyond the walls of our facilities. Our suppliers are a critical component of our ability to provide our customers with exactly what they need and when they need it. All suppliers are required to adhere to ORAFOL's strict standards for perfect quality and on-time delivery.

### Brilliant Grade

# ORALITE® 6910

For traffic signs for long-term outdoor exposure

**ORALITE®**

**Product benefits include:**

- High prismatic brightness
- Surface of high performance acrylic film
- Compliance to AS/NZS 1906.1 Class 1W
- Weatherproof
- ORALITE® 6910 is CE-certified
- 12 years outdoor durability\*\*
- Available in fluorescent colours for enhanced daytime visibility
- Excellent printability
- Lettering Film: We recommend ORALITE® 5081
- Transparent and black Film: We recommend ORALITE® 5061

High Intensity Prismatic (HIP) Construction Grade

ORALITE® 5960

Prismatic reflective film designed for short and medium term outdoor applications

Product benefits include:

- UV stabilised acrylic film
- Compliance to AS/NZS 1906.1 Class 1W
- Excellent corrosion and solvent resistance
- Weatherproof
- 5 years outdoor durability
- Lettering Film: ORALITE® 5081
- Transparent Film: We recommend ORALITE® 5061 or ORALITE® 5051
- Adhesion to a wide variety of substrates

## UV Traffic Signs Printer

The UV digital printing system is an environmentally friendly alternative to the screen printing technology. It is ideal especially for smaller production runs as well as for production of signs with variable information, directions and other information that may require only a quantity of one or two signs.

### ORALITE® UV Traffic Sign Printer

The ORALITE® UV traffic sign printer is based on the AGFA UV printer Anapurna M 2050 / M 2050i and of the CE certified ORALITE® 5019 UV digital printing inks. The following CE certified ORALITE® retroreflective films both for temporary and permanent applications can be printed by the ORALITE® UV digital printing system:

- ORALITE® 5510 Engineer Grade
- ORALITE® 5710 Engineer Grade Premium
- ORALITE® 5810 High Intensity Grade
- ORALITE® 5910 High Intensity Prismatic Grade
- ORALITE® 5960 High Intensity Prismatic Construction Grade
- ORALITE® 6910 Brilliant Grade

Compared with the current solutions for the production of traffic control and guidance signs available in the market, the optimised ORALITE® UV digital printing system is characterised by the following features:

- proven and reliable print head technology made by the market leader Konika Minolta

- six print heads 12 pl for printing the basic traffic colours
- additionally two print heads 42 pl for special applications (e.g. clear coat for temporary traffic signs without additional transparent film laminations, white, opaque, etc.)
- optional colour mixes also for graphic applications are possible (e.g. dark green, grey)
- space-saving, stable and reliable hybrid solution for the processing of plates up to 4,5 cm thickness as well as of materials in rolls (roll-to-roll)
- printing speed comparable to existing systems in the market while offering a higher resolution, more detailed drawings and highest production safety.

A comprehensive, worldwide service system ensures the performance and efficiency of the ORALITE® UV digital printing system for the manufacture of traffic and control signs on the basis of ORALITE® retroreflective films.

## Traffic Signs and Work Zones

### High Intensity Grade

# ORALITE® 5810

Long term outdoor applications

ORALITE®

#### Product benefits include:

- High performance acrylic film
- Encapsulated Glass Bead construction
- Weatherproof
- ORALITE® 5810 is CE-certified
- Compliance to AS/NZS 1906.1 Class 1
- Excellent printability
- Excellent adhesion to metallic surfaces (e.g. aluminium and galvanised steel)
- Transparent and black Film: We recommend ORALITE® 5061

Product	Colour range	Printing	Roll sizes	Outdoor durability
ORALITE® 5810	White, yellow	Ink-jet and screen printing UV printing	1235mm x 50m	10 Years

Please Note: Strictly intended for adhesion onto even surfaces

### Engineer Grade Premium

# ORALITE® 5710

Long term outdoor applications

ORALITE®

#### Product benefits include:

- Reflectivity exceeds 100 cd/(lx·m<sup>2</sup>) at 0,2° / 5° (for white colour)
- Compliance to AS/NZS 1906.1 Class 2
- Alkyd resin surface
- Weatherproof
- ORALITE® 5710 is CE-certified
- Excellent printability
- Excellent adhesion to metallic surfaces (e.g. aluminium and galvanised steel)
- Lettering Film: We recommend ORALITE® 5081 Black / Transparent Film: We recommend ORALITE® 5051

Product	Colour range	Printing	Roll sizes	Outdoor durability
ORALITE® 5710 PREMIUM	White, yellow	Screen printing UV printing	1235mm x 50m	7 Years

Please Note: Strictly intended for adhesion onto even surfaces

ORALITE® 5710 **Engineer Grade Premium** application

ORALITE® 5810 **High Intensity Grade** application

ORALITE® 5400 **Commercial Grade** application

## Commercial Grade

# ORALITE® 5400

**ORALITE®**

**Medium term outdoor applications**

### Product benefits include:

- Cast PVC film
- Weatherproof
- Meets AS/NZS 1906.1 Class 2
- Excellent printability for both Ink-jet and screen printing Inks
- High resistance to corrosion and solvents
- Excellent cutting properties
- Excellent adhesion to metallic surfaces (e.g. aluminium and galvanised steel)
- Good adaptability to uneven surfaces

Product	Colour range	Printing	Roll sizes	Outdoor durability
ORALITE® 5400	White, yellow red, blue	Ink-jet and screen printing	1235mm x 50m	3 to 4 Years

Please Note: Strictly intended for adhesion onto even surfaces

O10 White\*

O20 Yellow\*

O30 Red\*

O50 Blue\*

*\*Colours may not be a 100% colour match of the actual material.*

## Economy Grade

# ORALITE® 5200

**ORALITE®**

**For sign boards, lettering, markings, symbols and graphic applications**

### Product benefits include:

- Cast PVC polymer blend surface
- Short term outdoor use
- When a minimal degree of reflectivity is needed
- Weatherproof
- Flexible
- Excellent printability for both Ink-jet and screen printing inks
- Excellent adhesion to metallic surfaces (e.g. aluminium and galvanised steel)

Product	Colour range	Printing	Roll sizes	Outdoor durability
ORALITE® 5200	White, yellow	Ink-jet and screen printing	1235mm x 50m	1 to 2 Years

Please Note: Strictly intended for adhesion onto even surfaces

## Traffic Signs and Work Zones

### Lettering Films

**ORALITE®**

## ORALITE® 5081 / 5051

Product	Colour range	Recommended for use on	Material	Outdoor durability
ORALITE® 5081	Black (Gloss+Matt)	High Intensity Prismatic Grade High Intensity Grade	High performance cast PVC film	5 to 7 Years
ORALITE® 5051	Clear, red, blue, green	Temporary Signs Vehicle Markings HIP Construction Grade Engineer Grade Premium	High performance cast PVC film	5 to 7 Years

**Please Note: ORALITE®5051 Ensures compliance with the minimum reflective values and colour coordinates of AS/NZS 1906.1**

### Transparent Film

**ORALITE®**

## ORALITE® 5061

Product	Colour range	Recommended for use on	Material	Outdoor durability
ORALITE® 5061*	Clear, red, blue, green, black	Brilliant Grade High Intensity Prismatic Grade High Intensity Grade	High performance acrylic film	10 Years

**Please Note: ORALITE 5061 Ensures compliance with the minimum reflective values and colour coordinates of AS/NZS 1906.1**

\*The film is approved for application on CE certified ORALITE® films

### Roll Up Signs

**ORALITE®**

## ORALITE® 2018 / 2051 / 2056 / 5946

Product	Colour Range	Description	Standards	Application
ORALITE® 2018 Highbright	White, yellow, blue, red, fluorescent lime, fluorescent pink, fluorescent red, fluorescent green	High performance vinyl film RF welded to a reinforced scrim backing. Custom panels made to order	AS/NZS 1906.1 Class 1 & Class 1W	For use in temporary work zone, construction, and emergency applications.
ORALITE® 2051 Superbright	Fluorescent orange	High performance Fluorescent vinyl film RF welded to a reinforced scrim backing. Custom panels made to order	AS/NZS 1906.1 Class 1 & Class 1W	For use in temporary work zone, construction, and emergency applications.
ORALITE® 2056 Marathon	Fluorescent orange	Long life fluorescent vinyl film RF welded to a reinforced scrim backing. Custom panels made to order	AS/NZS 1906.1 Class 1 & Class 1W	For use in temporary work zone, construction, and emergency applications.
ORALITE® 5946	White, yellow, fluorescent orange, fluorescent yellow-green	High performance microprismatic structures are to the rear of a translucent PVC top film which is bonded to a reinforced scrim backing. Sold only in rolls of 1235mm	AS/NZS 1906.1 Class 1	For use in temporary work zone, construction, and emergency applications.

**Please Note: Printing and symbols are for display purposes only. Roll up signs are sold as blanks**

### Cone Collars

**ORALITE®**

## ORALITE® 2018

ORALITE® High Performance Cone Collars are made of a tough, weather-resistant, highly reflective microprismatic retroreflective sheeting. ORALITE® cone collars are manufactured in configurations to meet a wide variety of specifications and cone sizes.

#### Product benefits include:

- Highly durable and Impact resistant
- Complies to AS/NZ 1906.1 Class 1 and Class 1W (WZ)
- Excellent visibility at great distances
- Excellent wide angle performance
- Solvent resistant
- Easily wiped clean
- Can be removable for temporary use, or made permanent
- Slip on design

Product	Colour range	Sizes	Standards
ORALITE® 2018 White Highbright	White	450mm Cone – 150mm Collar 700mm Cone – 250mm Collar 900mm Cone – 250mm Collar NZ 900mm Cone – 100 and 150mm Twin Collar	AS/NZS 1906.1 Class 1 (WZ) AS/NZS 1906.1 Class 1W (WZ)

### Prismatic Construction Grade

**ORALITE®**

## ORALITE® 5930

#### For Cone Collars and Bollard Sleeves

ORALITE® retroreflective series 5930 Prismatic Construction Grade films are flexible, highly reflective, weatherproof, self-adhesive films with excellent corrosion and solvent resistance. The product was developed for the manufacture of temporary traffic control, guidance, warning, construction work zones.

#### Product benefits include:

- Highly reflective prismatic film
- Excellent visibility at great distances
- Excellent wide angle performance
- Surface of special treated PVC film
- Computer cut to shapes
- Pressure sensitive adhesive
- Excellent adhesion to polyolefinic substrates

Product Identification  
pattern for ORALITE® 5930

ORALITE® 5930	White	450mm Cone – 150mm Collar 700mm Cone – 250mm Collar 900mm Cone – 250mm Collar 1000mm Bollard – 250mm Collar NZ 900mm Cone – 100 and 150mm Twin Collar	AS/NZS 1906.1 Class 1 (WZ) AS/NZS 1906.1 Class 1W (WZ)

Typical application examples for ORALITE® 2018 cone collars & ORALITE® 5930 construction grade cone collars

## Vehicle Conspicuity

Every day, emergency services vehicles are on the roadways protecting or helping people. Visibility of those vehicles is a critical factor in the safety of motorists and the public servants operating in or near the vehicles. It is especially critical during emergency situations where traffic may be required to stop or change course unexpectedly.

That's why ORAFOL offers only the highest performance reflective materials for marking and graphics applications for EMS fleet livery. Because of these materials' quality, durability and ease of application, they have become the preferred choice for many of the largest police and ambulance services around the world.

Products in this range include:

**ORALITE®**

# Vehicle Conspicuity

Prismatic flexible livery film – for easy application even onto curved surfaces

**ORALITE®**

## ORALITE® VC 612 Flexibright™

**Product benefits include:**

- PVC construction
- Prismatic reflective performance
- Very high brightness
- Meets AS/NZS 1906.1 Class 1 colour and reflective requirements
- Unique handling
- User friendly application, no edge sealing
- Engineered to conform to demands of vehicle shapes
- Flexible – great for application onto curved surfaces e.g. motorbikes
- Easy to cut and no edge sealing required
- Withstands power washes
- Potential single piece removability
- Templates require fewer pieces
- Available in 7 colours, including fluorescent
- Self adhesive backing

Product identification pattern for VC 612 Flexibright

Product	Colour range	Roll sizes	Typical Durability
ORALITE® VC 612 Flexibright™	White, yellow, blue, green, red, fluorescent lime, fluorescent orange	775mm x 45.7m Custom widths available	Non-fluorescent colours: 5 years fluorescent colours: 3 to 5 years (depending on geographical region)

### Prismatic flexible livery film – Your classic film for high visibility livery

## ORALITE® VC 312 Daybright®

**ORALITE®**

#### Product benefits include:

- Polyester construction
- Very high brightness
- Meets AS/NZS 1906.1 Class 1 colour and reflective requirements
- Easy to cut and apply
- Wide angle performance
- Available in 5 colours
- No edge sealing required
- Withstands repeated power washes
- Easy accident damage repair
- Self adhesive backing

Product identification pattern for VC 312

Product	Colour range	Roll sizes	Typical Durability
ORALITE® VC 312 Daybright®	White, red, yellow, blue, green	775mm x 45.7m Custom widths available	7 years

### Prismatic Construction Grade

## ORALITE® 5930

**ORALITE®**

#### For Vehicle Livery Applications

ORALITE® 5930 retroreflective sheetings and tape are flexible, highly reflective, weatherproof, self-adhesive films with excellent corrosion and solvent resistance. ORALITE® 5930 exceeds the minimum performance requirements of AS/NZS 1906.1 class 1 and class 1W when measured in new condition.

#### Product benefits include:

- Highly reflective prismatic film
- Surface of special treated PVC film
- Fluorescent colours available for enhanced daytime visibility
- Excellent solvent and corrosion resistance
- Compliance to AS/NZS 1906.1 Class 1 and Class 1W
- Lettering Film: We recommend ORALITE® 5051 Lettering Film
- Excellent printability

Product Identification pattern for ORALITE® 5930

Fleet Engineering Grade Reflective Film

ORALITE® 5650RA

RapidAir® Technology is designed to make fleet applications easier by reducing the incidence of bubbles, ORALITE® 5650RA series is ideal for vehicle applications over flat surfaces, rivets and simple curves.

Product benefits include:

- Glass bead reflective performance
- High degree of flexibility
- Easy to apply, with good adaptability for uneven surfaces
- Easy removal from painted surfaces (Using Heat)
- Easy to use on plotters
- Compatible with popular latex, solvent, eco-solvent & UV curable printers
- 5 year outdoor durability (Unprinted)
- With RapidAir® for easy application.

Product	Colour range	Roll sizes	Typical Durability
ORALITE® 5650RA	White Other colours available by Indent	1220mm x 50m	5 years

Typical application examples for the ORALITE® 5650RA Fleet Engineering grade

## Trucks & Trailers

**For application onto rigid surfaces**

**ORALITE®**

### ORALITE® VC 104+ Rigid Grade

**Product benefits include:**

- Approved to Regulation ECE 104 class C
- Outstanding long distance night time visibility
- Easy to handle and apply
- No edge sealing required
- Easy to cut
- Polyester construction means no cracking
- Resistant to power washing
- Highly resistant to most industrial cleaning processes
- Single layer prismatic construction with adhesive backing
- Emark: ORALITE-C-E4-104R 00 0001
- Self adhesive backing

Great Products in  
Great Looking Packaging!

## Personal Safety

ORAFOL® products for the workwear industry are designed and made to withstand the harsh demands of workers including:

- Utility workers
- Roadway construction crews
- Police officers & roadway emergency first responders
- Survey crews
- Crossing guards
- Railway workers
- Airline personnel
- Fire fighters

Our wide range of reflective trims provides high visibility for workers where increased visibility is vital to stay safe and be seen. Whether you prefer glass bead or microprismatic material, or even if your application must withstand industrial washes, all of our products meet or exceed AS/NZS 1906.4 Class R.

ORAFOL® high visibility garment trims enable rapid identification of first responders at an emergency management scene. Instantaneous identification at an emergency scene is valuable to both the public and first responder's safety.

We offer personal safety products that reflect their daytime colour, maintain performance when wet, resist dirt and continue to perform even in the face of the most abrasive work site elements.

Products in this range include:

**ORALITE®**

### AS/NZS 1906.4 Class R Compliant

**ORALITE®**

# ORALITE® GP 011 / GP 030 / GP 090 GP 092 / GP 095 / GP 097 / FTP 300

The simplest reflector is a glass sphere, also known as glass bead technology. In a glass bead system, light strikes the back surface of the bead and is returned to the source. Glass bead systems maintain their reflectivity over a wide range of lighting angles. They are a popular, economical alternative to microprismatic technology.

Our glass bead tapes are approved to AS/NZS 1906.4 Class R requirements. The range includes tapes for common frequently washed garments, that require high visibility. There are also different tapes available for working in the rain, as well as tapes that require heat, flame and ARC resistance.

#### Product benefits include:

- Compliance to AS/NZS 1906.4 Class R
- Cost effective alternative to microprismatic tapes
- Silver glass bead construction
- Washing: Approved according to domestic wash, ISO 6330:2000, Method 2A

ORALITE® FTP 300

**These products exceed the highest reflectivity of AS/NZS 1906.4 Class R**

**Product benefits include:**

- Superior performance tape in all weather conditions
- Attractive glossy surface - easy to wipe clean
- Slim and flexible to move with the garment
- Textile backing for sew-on applications
- Washing: according to domestic wash, ISO 6330:2000, Method 2A

**ORALITE®**

Product	Colour	Backing	Roll size	Washing	Application
ORALITE® GP 440	Silver, Fluorescent lime	Textile backing for sew-on	50mm x 50m	100 cycles at 60° C	General apparel, kit bags, Mine safety flags

GP 801 and GP 440

High Visibility Workwear

ORALITE® GP 110, GP 110 Breathable, GP 340, AU 350

These products exceed the highest reflectivity of AS/NZS 1906.4 Class R

Product benefits include:

- High performance prismatic tape
- Works when wet
- Reflects in all weather conditions
- Superior long distance visibility
- Available in vivid fluorescent colours for added visibility
- Safety without compromise
- Washing: according to domestic wash, ISO 6330:2000, Method 2A

Product	Colour range	Roll Size	Washing
ORALITE® GP 110	White, fluorescent lime	50mm x 50m	50 cycles at 65° C
ORALITE® GP 110 Breathable	White, fluorescent lime	50mm x 50m	50 cycles at 65° C
ORALITE® GP 340	White, fluorescent lime	25mm x 50m 50mm x 50m	50 cycles at 65° C
ORALITE® AU 350	Arco red	50mm x 50m	50 cycles at 65° C

ORAFOL has a wide range of reflective tapes suitable for every work environment

## Marine

For the maritime and offshore industries ORAFOL offers a variety of SOLAS approved tapes for marine applications such as life jackets, inflatable lifeboats and heavy duty marine rainwear.

### ORALITE® FD 1403 and FD 1404

**ORALITE®**

**Product benefits include:**

- Microprismatic technology
- Compliance with SOLAS/IMO requirements
- Single layer construction - flexible and durable
- Brilliant long-range visibility
- Durable, superior abrasion resistance
- Waterproof
- Flexible, will easily conform to irregular or pitted surfaces
- Will survive continuous immersion in sea water and freezing temperatures
- Kiss Cut patches available

FD 1403

FD 1404

Product	Colour	Construction	Roll size	Immersion	Approval
ORALITE® FD 1403	Silver	Polyester top film fabric-backed or pressure sensitive adhesive	50mm x 45.7m	Type I - 750 hours Type 2 - 1500 hours	SOLAS/IMO European BV US Coast Guard
ORALITE® FD 1404	Silver	PVC top film pressure sensitive adhesive	50mm x 45.7m	Type I - 750 hours	SOLAS/IMO European BV

# Mining and Construction

## ORALITE® Mine Hanging Streamers & Droppers

ORALITE® mine hanging streamers and tags are a unique way of delineating underground roadways. Research has proven that colour and long distance visibility play a major role in safety. By making work areas more visible, we can reduce the risks of death and injury.

**Product benefits include:**

- Double sided: Can be seen in both directions
- Reflects colour: Colour coding for different applications
- Attach with ease: Eyelets, magnets and press studs
- Complies to AS/NZS 1906.1 Class 1
- Reinforced and non-reinforced
- Two colour combinations
- Weighted
- Computer cut lettering applied

Product	Colour range	Width	Length
Non-reinforced	White, yellow, orange, red, blue, fluorescent orange, fluorescent lime, fluorescent pink, fluorescent red, fluorescent green	25mm and 50mm	Custom lengths
Non-reinforced with plastic insert	White, yellow, orange, red, blue, fluorescent orange, fluorescent lime, fluorescent pink, fluorescent red, fluorescent green	50mm	500mm to 2m
Reinforced	Yellow, blue, fluorescent lime, fluorescent pink, fluorescent green	50mm	Custom lengths

# ORALITE® Cable Patches and Tags

ORALITE® cable tie rope patches and tags are the solution to your delineation of conveyor belts and for identifying areas where colour coding is necessary.

**Product benefits include:**

- Brightest retroreflective technology
- Long distance visibility
- Double sided: Can be seen in both directions
- Wet performance
- Extensive range of colours
- Reflection in the colour of the tape
- Abrasion and wash resistance
- Custom made to your requirements
- Complies to AS/NZS 1906.1 Class 1

Product	Colour range	Sizes
Non-reinforced	White, yellow, orange, red, blue, fluorescent orange, fluorescent lime, fluorescent pink, fluorescent red, fluorescent green	105mm x 48mm x 5mm hole 110mm x 80mm x 5mm hole 110mm x 110mm x 5mm hole 180mm x 95mm x 5mm hole 180mm x 95mm x 22mm hole 160mm x 50mm x 22mm hole 210mm x 60mm x 22mm hole

# ORALITE® Helmet Stickers Airbacked and Channeliser

ORALITE® Helmet Stickers are manufactured in both airbacked prism and metalised retroreflective channeliser materials. Standard colours and sizes are available in both airbacked and channeliser products.

**Product benefits include:**

- Brightest retroreflective technology
- Long distance visibility
- Wet performance
- Reflection in the colour of the tape
- Custom made to your requirements
- Complies to AS/NZS 1906.1 Class 1

Product	Colour range	Sizes
ORALITE® HP Airbacked	White, fluorescent lime, fluorescent red	25mm x 100mm (16/Sheet)
ORALITE® Channeliser	White	25mm x 230mm Straight 25mm x 220mm Curved

Channeliser Application

Channeliser

# ORALITE® Cone Collars

These materials are ideal for use on temporary traffic zones and demarcation of blast areas.

**Product benefits include:**

- Prismatic high brightness materials
- Vinyl Construction
- Wide angle performance
- Superior durability
- We offer custom sizes on request
- Custom text available
- Fluorescent colours available for added visibility during the day and in adverse weather conditions

Product	Colour range	Sizes	Standards
ORALITE® 2018 Highbright	White, yellow, orange, red, blue, fluorescent orange, fluorescent lime, fluorescent pink, fluorescent red, fluorescent green	150mm Collar 250mm Collar 250mm Collar 700 mm Collar Custom Sizes	AS/NZS 1906.1 Class 1

# ORALITE® Picket Pockets

ORALITE® picket pockets are used in the delineation and demarcation of haul roads and intersections, blasting areas and for general site safety.

**Product benefits include:**

- Prismatic high brightness materials
- Vinyl construction
- Wide angle performance
- Superior durability
- We offer custom sizes on request
- Custom text available
- Fluorescent colours available for added visibility during the day and in adverse weather conditions

Product	Colour range	Sizes	Standards
ORALITE® 2018 Highbright	White, yellow, orange, red, blue, fluorescent orange, fluorescent lime, fluorescent pink, fluorescent red, fluorescent green	150mm x 1000mm 175mm x 600mm 175mm x 750mm 175mm x 1000mm 200mm x 750mm 200mm x 1000mm Custom Sizes	AS/NZS 1906.1 Class 1

# ORALITE® Rollup Signs

## 2018 / 2051 / 2056 / 5946

ORALITE® uses its proprietary microprism reflective system to produce superior products in a flexible format that exceeds performance requirements of on site applications. Reflective roll up sign panels are of a much lighter weight than boxed edge signs. There are no sharp edges or corners. This improves safety factors for both the users and on site vehicles.

### Product benefits include:

- Prismatic high brightness materials
- Vinyl construction
- Wide angle performance
- Superior durability
- Most systems will fold down to compact sizes.
- We offer custom sizes on request
- Fluorescent colours available for added visibility during the day and in adverse weather conditions

Product	Colour Range	Description	Standards	Application
ORALITE® 2018 Highbright	White, yellow, blue, red, fluorescent lime, fluorescent pink, fluorescent red, fluorescent green	High performance vinyl film RF welded to a reinforced scrim backing. Custom panels made to order	AS/NZS 1906.1 Class 1 & Class 1W	For use in temporary work zone, construction, and emergency applications.
ORALITE® 2051 Superbright	Fluorescent orange	High performance fluorescent vinyl film RF welded to a reinforced scrim backing. Custom panels made to order	AS/NZS 1906.1 Class 1 & Class 1W	For use in temporary work zone, construction, and emergency applications.
ORALITE® 2056 Marathon	Fluorescent orange	Long life fluorescent vinyl film RF welded to a reinforced scrim backing. Custom panels made to order	AS/NZS 1906.1 Class 1 & Class 1W	For use in temporary work zone, construction, and emergency applications.
ORALITE® 5946 Hi Intensity Grade	White, yellow, fluorescent orange, fluorescent lime	High performance microprismatic structures are to the rear of a translucent PVC top film which is bonded to a reinforced scrim backing. Sold only in rolls of 1235mm	AS/NZS 1906.1 Class 1	For use in temporary work zone, construction, and emergency applications.

Please Note: Printing and symbols are for display purposes only. Roll up signs are sold as blanks

### Customisation

Create sleeves or pockets as needed, custom sizes, eyelets, magnetic, guide post and even (within limitations) produce a multi message product!

## Mine Spec Vehicles

### Flexible high performance prismatic film

## ORALITE® VC 612 Flexibright™

#### Product benefits include:

- Improves driver safety
- No edge sealing
- Conformable and adaptable
- Easy to apply
- Weather proof
- Meets AS/NZS 1906.1 Class 1
- Withstands power washing
- Wide angle performance
- Highest reflective brightness
- Easy damage repair
- Solvent resistance
- Superior durability
- Fluorescent colours
- Available in widths from 25mm to 775mm

**ORALITE®**

Product	Colour range	Roll sizes	Typical durability
ORALITE® VC 612 Flexibright™	White, yellow, blue, green, red, fluorescent lime, fluorescent orange	775mm x 45.7m Custom widths available	Non-fluorescent colours: 5 years Fluorescent colours: 3 to 5 years (depending on geographical region)

### Prismatic Construction Grade

## ORALITE® 5930

#### For High Visibility on Mining & Construction Sites

#### Product benefits include:

- Highly reflective prismatic film
- Surface of special treated PVC film
- Fluorescent colours available for enhanced daytime visibility
- Meets AS/NZS 1906.1 Class 1 and Class 1W
- Excellent printability
- Available in widths from 25mm to 1235mm

**ORALITE®**

Product	Colour range	Roll sizes	Typical durability
ORALITE® 5930	White, yellow, fluorescent yellow, fluorescent yellow-green, fluorescent orange	1235mm x 50m 1235mm x 25m Custom widths available	5 Years
